Subject: Official end of COVID-19 epidemic in Republic of Slovenia

I am pleased to share good news from our government, who called an official end to coronavirus epidemic in Slovenia. In addition, people arriving in Slovenia from other European Union states will no longer be obliged to go into a quarantine. To keep being safe we are still required to wear masks in indoor public spaces, stand at least 1.5 metres apart and disinfect hands upon entering public spaces.

Throughout epidemic Sensum was fully operational without any outbreak in the company, and we are taking all required safety measures to keep it this way. As a supplier of essential technology to pharmaceutical industry we continue to assist our customers, as we understand the importance of their production running, to provide an uninterrupted supply of drugs to the patients.

I am looking forward to greet our customers again in our facilities to present our technologies and to share news about our latest innovations.

Yours Sincerely,

dr. Rok Bernard, Managing Director
